RE: *Speed Hump Request Form- Vicklan Street*

Dear Ms. Browning:

Thank you for your submitting the Speed Hump Request Form for the installation of speed humps on Vicklan Street.

The City of Vicksburg's engineering firm, Neel Schaffer, conducted a traffic calming study to determine if Vicklan Street met the requirements for the installation of speed humps based on the City's ordinance. According to the City's Ordinance, a street must have a minimal traffic volume of more than 100 vehicles per day but less than 3,000 vehicles per day.

Neel Schaffer reported in the Traffic Calming Study that:

- The 85th percentile speed for Vicklan Street was observed to be 24 miles per hour with most drivers driving between 14 to 23 mph.
- Roughly 96 vehicles were counted in a single day traveling on Vicklan Street which does not meet the minimum requirement of more than 100 vehicles

The Board of Mayor and Aldermen of the City of Vicksburg appreciate you for submitting the request for the installation of speed humps on Vicklan Street. However based on the Traffic Calming Study, your request is hereby denied as Vicklan Street does not meet the requirements for speed humps. Thank you for your time and attention to correspondence.

Sincerely,

Willis Thompson, Mayor
