RE: Cost Estimate for Sewer Main Repair and Installation Near Railroad

Dear Ms. Nailor,

In regard to the request from the City of Vicksburg to furnish an updated cost estimate to install and repair existing force main and gravity flow sewer piping and structures, we are pleased to offer the following.

Hemphill Construction Company, Inc. will furnish labor, equipment and materials necessary to perform the sewer repair needed, based on Allen & Hoshall's email received on 5/7/2026, for the approximate cost of \$776,000.00.

This cost estimate is based on:

- Furnishing an updated engineered designed and sealed shoring plan for use in the railroad ROW or zone of influence.
- Furnishing and installing a steel sheeted pit around the new downstream doghouse manhole.
- Furnishing and installing pipe, fittings, manholes, and needed material.
- Furnishing a railroad flagman, as-needed.
- Coating the interior of the new junction box with 100% solids epoxy.
- Utilizing the Labor and Equipment rates that were used in the current contract.

If you have any questions regarding the information above, please do not hesitate to contact me.

Sincerely,

HEMPHILL CONSTRUCTION COMPANY, INC.

Cody Roberts
Project Manager

The difficult we do immediately, the impossible takes a little longer!
