Re: Property located at 1316 Second North Street

Dear Board,

I am requesting permission to install a tin fence around my property located at the above address. My purpose for requesting tin as compared to wood, stone or brick is that tin is known to last 20 – 25 years longer than wood or the others according to my research. It is also more in line with what I need for my business and easier for me to work with than brick, stone or wood.

Your approval to my request will be greatly appreciated.

With Sincere Thanks,

Moses L. Brown, Owner

Victor Gray-Lewis  
Director

RE: Screening of car's stored at service garages.

Dear Owner:

On August 7, 2006 the Board of Mayor and Aldermen adopted an ordinance that required security screening of junk yards, salvage yards, wrecker yards, and metal recycling centers and for other related matters.

Pursuant to Section 11-67 of this ordinance, all junk, salvage, tire storage and wrecker yards and metal recycling centers shall be screened from view from the public roadways by a security fence of a minimum height of six (6) feet. **Areas where inoperable or wrecked motor vehicles are stored at wrecker service establishments, repair or service garages**, dealerships and other similar establishments shall be located behind the front wall plane of the principal building and screened from view from public roadways if within three hundred (300) feet of such roadway and by a security fence of a minimum height of six (6) feet. The security fence shall be constructed of wood, block, brick or stone and built in accordance with the provisions of the applicable International Building Code.

**Note: all motor vehicles to be repaired must be stored behind the building or a Fence screen area from public view the owner must be in compliance within (30 ) days of receipt of this letter.**

Please be aware that prior to beginning construction, the location of and construction materials for the security fence must be approved by the Building & Inspection Department. Should you have any questions please call 601-634-4528.

Sincerely,

  
Dalton T. McCarty  
Building & Inspection Department
